SUMMARY

A passionate Software Engineer and Informatics Engineering student with a strong focus on architecting and implementing scalable backend systems using JavaScript/TypeScript and Python. Proficient in RESTful API principles and gaining practical experience in cloud computing with AWS and GCP. Eager to contribute to impactful projects, solve complex challenges, and continually grow in dynamic environments, with a growing expertise in AI and its real-world application.

WORK EXPERIENCE

Module Assistant

Integrated Laboratory (iLab), Gunadarma University • *Contract*

Jul 2025 – Present

- Reviewed and managed practicum modules to ensure quality and consistency in academic materials.
- Assisted students with technical questions and guided them through practical exercises.
- Prepared and maintained official reports and documentation for academic and administrative use.

Software Engineer

Universa AI • *Part-time*

Aug 2025 – Oct 2025 | Remote

- Developed backend automation systems and integrated **AI agents** using **Python**.
- Engineered asynchronous workflows and service orchestration pipelines for autonomous AI operations.
- Optimized API performance and internal tooling to improve system reliability and automation speed.

Fullstack AI Developer

Universa AI • *Internship*

may 2025 – Jul 2025 | Remote

- Built an AI-powered web application for protein structure prediction using **Python** and **Javascript**.
- Integrated **AI LLMs** for protein modeling and deployed inference pipelines with **Docker**.
- Deployed and hosted the full system on **Hugging Face Spaces** for reproducible performance.

PROJECTS

AI-Driven Protein Discovery

Fullstack AI Web Project – Jul 2025

AI-powered web app for predicting and visualizing protein structures in 3D based on user prompts.

- Built with **Python**, **FastAPI**, and **Streamlit**; deployed on **Hugging Face Spaces** using **Docker**.
- Integrated **LLMs (Mistral AI)** and **protein models (ESMFold, ColabFold)** for high-accuracy structure inference.
- Designed an intuitive interface for real-time structure visualization and model interaction.

Tech Stack: Python, FastAPI, Streamlit, PostgreSQL, Docker, Hugging Face Spaces

Demo: [origin-protein-clone](#)

OpenMusic API

Backend API Project – Mar 2025

Backend system for managing songs, albums, and playlists with authentication and caching.

- Implemented RESTful endpoints using **Hapi.js**, **PostgreSQL**, and **Redis** for high-performance data handling.
- Added **JWT authentication**, playlist collaboration, and export features via **RabbitMQ**.
- Integrated **AWS S3** for album cover uploads and improved scalability.

Tech Stack: Node.js, Hapi.js, PostgreSQL, Redis, RabbitMQ, AWS S3

Real-Time Chat App

Fullstack Web Project – Jan 2025

MERN-based chat platform supporting live messaging and image sharing.

- Built using **React**, **Node.js**, **Socket.io**, and **MongoDB** for real-time performance.
- Implemented **JWT** authentication, **Cloudinary** image storage, and responsive UI with **TailwindCSS**.
- Deployed backend on **Railway** and frontend on **Vercel**.

Tech Stack: MERN Stack (MongoDB, Express, React, Node.js), Socket.io, JWT, TailwindCSS

Demo: yapper-ten.vercel.app | [GitHub](#)

Digital Restaurant Menu Web App

Fullstack Web Project – Dec 2024

Web app that allows users to browse and order food from a restaurant's digital menu.

- Developed with **Express.js**, **MongoDB**, and **JWT** for secure admin and user management.
- Built CRUD interfaces for menu, orders, and authentication panels using **TypeScript**.
- Deployed frontend on **Vercel** with fast server-side rendering.

Tech Stack: TypeScript, Express.js, MongoDB, JWT, Vercel

Demo: web-foodscoop.vercel.app | [GitHub](#)

EDUCATION

GUNADARMA UNIVERSITY | Depok, West Java

Bachelor's Degree in Informatics | 2022 – Present

SMA CAKRA BUANA | Depok, West Java

Science Major (MIPA) | 2019 - 2022

SKILLS

- **Programming Languages:** JavaScript/Typescript, PHP, Python
- **Frameworks & Tools:** Express.js, React, Hapi.js, Streamlit, FastAPI
- **Database:** MongoDB, PostgreSQL, MySQL, Redis
- **Version Control:** Git, GitHub, Gitlab, HuggingFace Space
- **Cloud & Deployment:** AWS, GCP, Docker, Railway, Vercel, Netlify
- **Other Tools:** Figma, Blender, Rabbitmq, Socket.io, nodemailer, draw.io
